

Founded in 1997, Revana Family Vineyards is a portfolio of wine growing estates with a single purpose - to produce site-specific wines from exceptional vineyards. With estates in California's Napa Valley, Oregon's Willamette Valley and Argentina's Uco Valley, each wine conveys a distinct sense of time and place. The vision of Dr. Madaiah Revana is comprised of three remarkable brands: Revana, Alexana and Corazon del Sol. Working with the world's top vineyard managers & winemakers, Dr. Revana provides the guiding philosophy of quality as his paramount goal and that winemaking begins in the vineyard.

## REVANA FAMILY VINEYARD | NAPA VALLEY | EST. 1997

**VINEYARD** | The Revana Estate Vineyard is a sustainably farmed 8.2-acre parcel established in 1997 with Vineyard Manager, Jim Barbour. Located in the heart of the St. Helena AVA, the vineyard contains three distinct soil types. The rarest is a vein of Perkin's Gravelly Loam, found in less than 0.6% of all vineyards in Napa. This deep, well-drained alluvial soil provides optimum conditions for our carefully selected Cabernet Sauvignon and Petit Verdot clones.

**WINEMAKERS | Heidi Barrett (2001-2010)** – As the founding winemaker of Revana Wines, Heidi's winemaking style focused on blending the entire 8.2 -acre estate to craft one single wine, the Revana Estate Cabernet. In 2010, her 2007 vintage was the highest rated Cabernet Sauvignon in the world.

**Thomas Rivers Brown (2011-Present)** - His artfully restrained approach utilizes single lot fermentations and native yeasts allowing for the purest expression of the Revana Estate. Thomas devotes the 4 northern blocks to our Estate bottling and the 4 southern blocks to our Terroir Series bottling.

## ALEXANA WINERY | WILLAMETTE VALLEY | EST. 2005

**VINEYARD** | The Alexana Estate is a geologically diverse 55-acre parcel consisting of 18 different soil types. The vineyard is dry farmed and located between 320-650 feet elevation in the pristine Dundee Hills AVA where sustainable and biodynamic farming methods are applied to cultivate premium Pinot noir, Chardonnay, Riesling & Pinot Gris.

**WINEMAKERS | Lynne Penner Ash (2006 - 2015)** - Lynne's distinct style utilized micro-fermentation tanks that isolate by clone and lot. Under the guidance and direction of Lynne, our gravity flow facility was built in the picturesque Dundee Hills AVA.

**Bryan Weil (2012 - Present)** - Bryan's minimalist approach to winemaking allows each vintage to tell the vineyard's story of the growing season. Utilizing only small lot fermentations and native yeasts, Bryan creates texture driven wines of complexity, sophistication and balance.

## CORAZON DEL SOL | UCO VALLEY | EST. 2008

**VINEYARD** | The Corazon Del Sol Estate is a 17-acre parcel planted in an ancient stone covered riverbed at the eastern base of the Andes Mountains in Argentina. Located near the Los Sauces village at 3600 feet elevation, where the UV Index is intense, and the air is thinner & cooler. Extreme shifts in temperature allow for the longest ripening window in the region and enables us to grow Bordeaux and Rhone Varietals of the highest caliber.

**WINEMAKER | Santiago Achaval (2008 - Present)** His methodical, purist philosophy respects and passes on what the vines have given the fruit with very little intervention. His caretaker like approach employs gentle extraction and co-fermentation techniques that allow him to craft wines of power, density and finesse.
